

Programme prioritaire de recherche  
**Antibiorésistance**

LE GRAND PLAN  
D'INVESTISSEMENT

## French Priority Research Programme on Antimicrobial resistance

**Inserm**

La science pour la santé  
From science to health

**PROMISE**

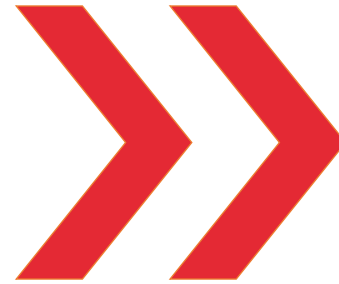

**Professional community network on antimicrobial resistance**

Marie-Cécile Ploy

Rencontres SPF – 26 Mai 2021

Tackle AMR

Stop working *in silos*

**PROMISE**

A unique place gathering professionals and academics from all sectors

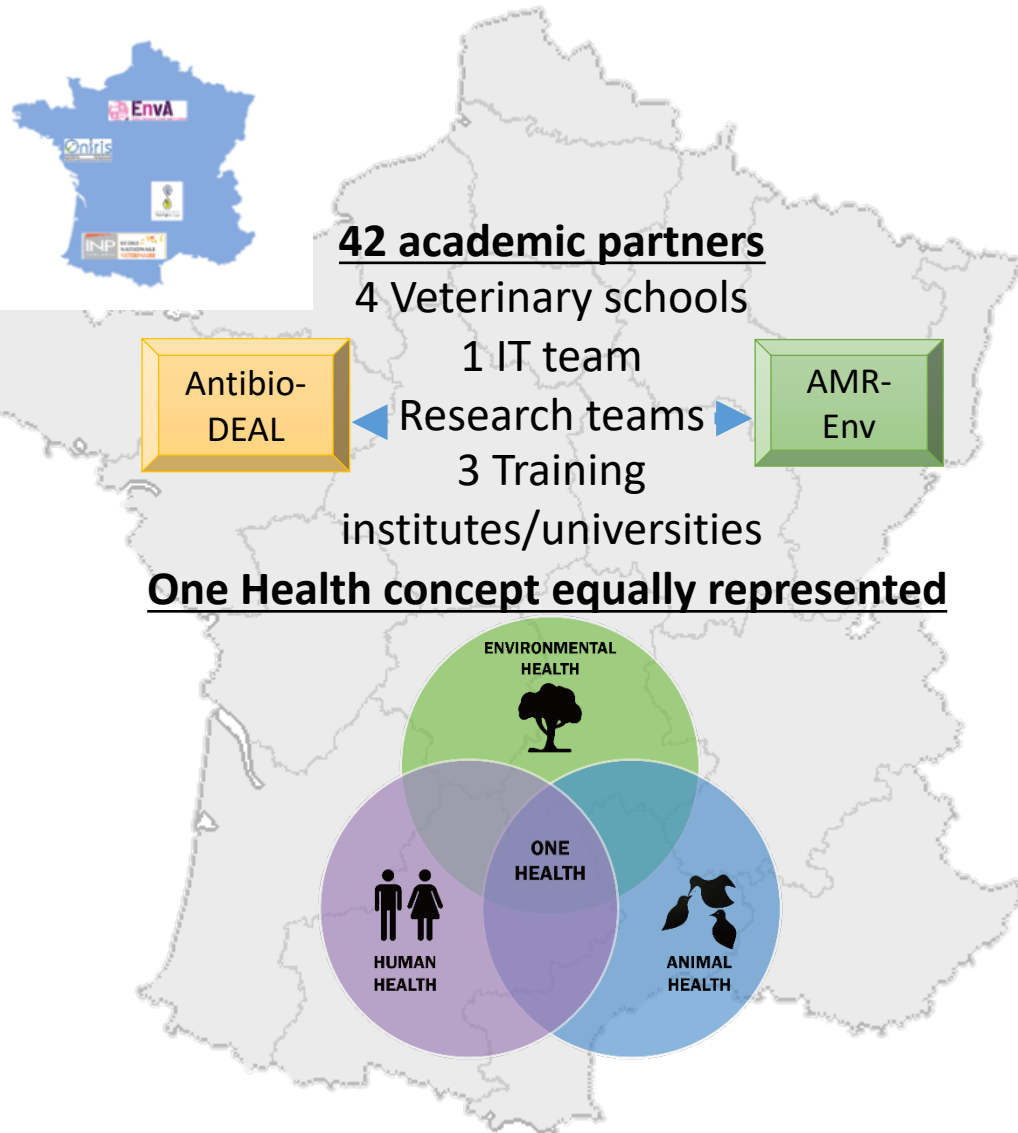

One Health Community on Antibiotic resistance

# Bring together major One Health actors

Programme prioritaire de recherche  
**Antibiorésistance**

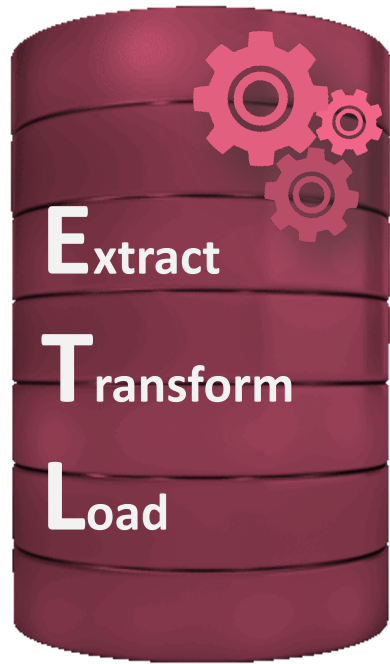

## 21 existing French professional networks

# WP1. A platform for data interoperability

## One Health Data sources

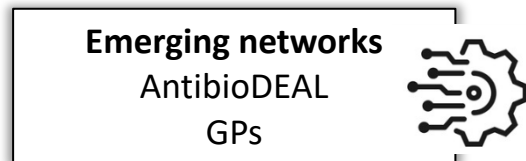

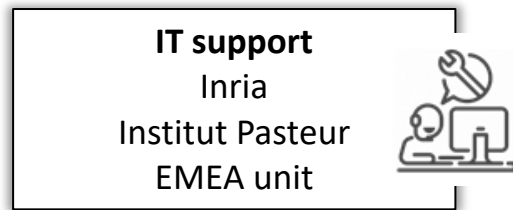

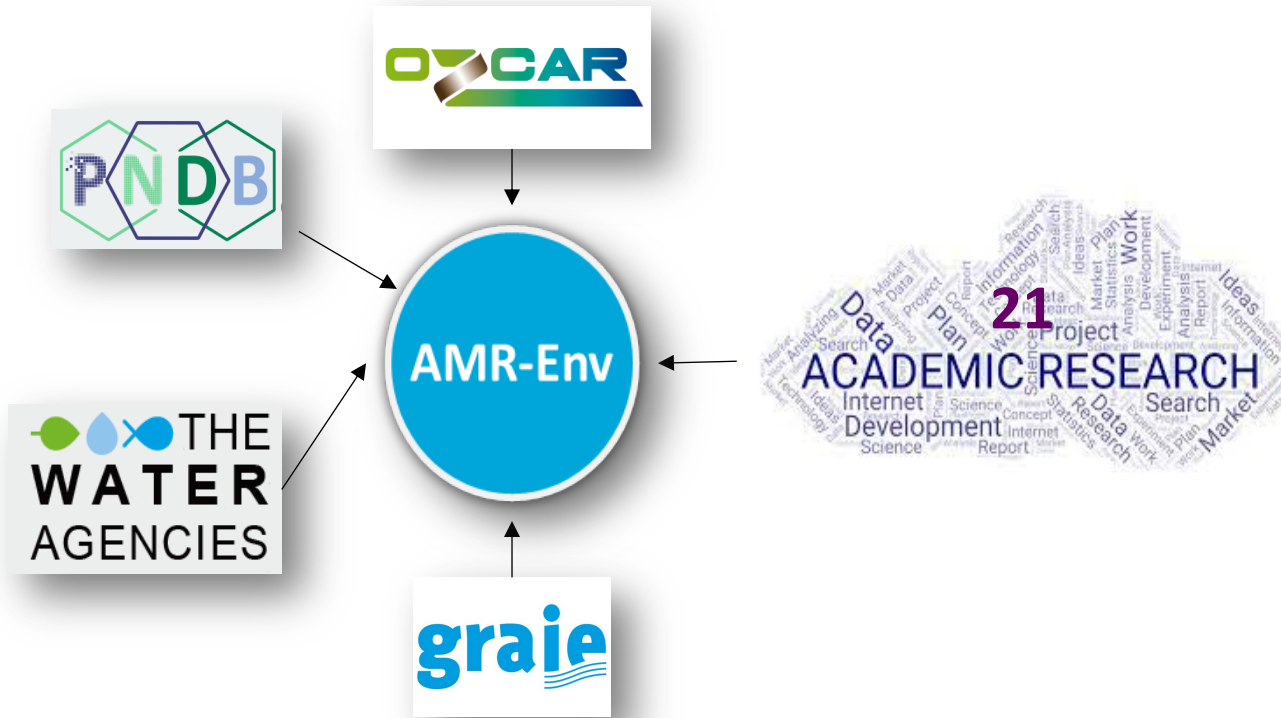

## WP2. A strong One Health vision

- Create a One Health community to put the One Health concept in practice
- Strengthening interactions and synergy between sectors
- Sharing best practices, knowledge and methodologies to accelerate research on AMR
- Encouraging structure of emerging networks that will be integrated into PROMISE

**Address research & surveillance gaps**

- Concerted actions and methodology (matrices, data collection, AMR indicators....)
- Coordination of a national surveillance system of AMR in the environment
- Identification of the set of data to be shared in the data warehouse
- Promotion of the national control of the dynamics of environmental pollution
- Addressing research gaps and apply to international calls

# WP3. strengthens the knowledge and skills of the meta-network members

Inform and develop the network

- Informing and building bridges between practitioners
- Understanding their expectations, needs and constraints
- Promoting scientific interactions
- Building transversal knowledge through workshops and conferences

Resources for communication and raising awareness

Courses (theoretical, digital, practical lectures),

One Health practitioners
